2.

3. In my code, it scrapes the imdb websites to look for specific key points and uses the variables of the input values on the excel sheet to find the movie rating and add it to a new excel sheet.

4. My tip is that there was a lack of motivation in the group, so there was a much-unbalanced amount of effort. I truly love this project and learning about RPA and getting this mock internship experience but it felt like I was the only one in my group excited. And only one of the other group members put in the same amount of effort as I did.
